LUMENA ENERGY™ ACADEMY

RENEWABLE ENERGY
TRADE SCHOOL

A STRONG FOUNDATION

Lumena Energy was founded by electrical and software engineers, with a combined 80 years of experience. Our core focus is the acceleration of renewable energy usage and education on a global scale.

Backed by top industry standards, certifications and practices our students learn industry certified knowledge as well as stay on the cusp of the latest technology available ensuring a high percentage of job placement upon successful completion of each program.

Our core focus is the acceleration of renewable energy usage and education on a global scale.

OUR VISION

FOCUSED ON THE FUTURE

The demand in the Renewable Energy sector will continue to grow for the next 20 years, the world currently does not have enough workers to fill those positions. That's where LEA comes in,

We are creating tangible results on and off the field. By 2031, our goal is to power one billion households globally, this is no easy feat but fortunately there is no shortage of willing students to make this vision a reality.

LEARNING METHODOLOGY

We pride ourselves on training students from all walks of life and all levels of experience in renewable energy. Our proprietary Learning Management System enables us to work virtually and in-person. Our instructors break students up into smaller groups to focus on one area at a time. and provide the individualized attention needed to lessen the learning curve drastically.

CURRICULUM

Our curriciulum consists of a 3 track program, each student completes compulsory PV101 course and then has the opportunity to dive into a more focused field such as: Solar Panel Installer, Virtual Power Plant Technician, Solar Technical Sales and more.

PARTNERS IN LEARNING

Our strategic partnerships with many Fortune 500 companies and industry adjacent fellows ensures our students receive top educational value, a high prospeect of job placement and access to actual work sites for both theoretical and real world training.
